

IPFA 3rd Asia Workshop on Plasma Quality and Supply - Technological, regulatory and organizational tools to produce plasma for fractionation

**Wednesday 21 and Thursday 22 March 2018
Kuala Lumpur, Malaysia**

PROGRAMME OUTLINE - as per 6 November 2017

Session 1: Opening and Setting the Scene

- Local presenters/officials:
 - Traditional opening
 - Formal opening
- Keynote Setting the Scene
- Current status of plasma/PDMP supply in Malaysia

Session 2: Meeting Patient Needs

- Clinical Management of Haemophilia in Malaysia/Region
- Clinical Management Immundeficiency in Malaysia/Region
- Use of IVIG in non immune indications
- Prothrombin Complex (PCC)

Session 3: Development of Quality Systems for Blood Establishments

- Getting the basics right / GMP for collection
- Developing a Culture of Quality in Blood Establishments
- Quality systems – Delivering Cost Savings
- Panel Discussion – to include case studies

Session 4: Quality Management

- Regulation of Blood Establishments in Malaysia
- Specific Requirements for Plasma for Fractionation
- Quality Management – A Risk Based Approach

Session 5 Manufacturers Session

- Presentations from supporting Industries

Session 6: Strategies for National/Regional Supply of PDMPs

- Strategic Independence – Australian Experience
- Perspective of Asia Pacific Economic Cooperation (APEC)
- Example from the region
- Considerations in Setting up a fractionation facility
- Panel Discussion

Session 7: Donor Recruitment and Plasma Collection

- Converting whole blood donors into plasma
- Experience in the region
- Establishing Plasma Donor panels

Session 8: Epidemiological considerations and donor screening strategies

- Donor epidemiology in the region
- Emerging TTIs
- Screening strategies: Serology/NAT screening algorithms

Meeting Closure
